Understanding PeopleSoft Application Engine

"Hi can anyone please tell me the difference between do-while, do-when, do-until and do-select in app engine. I read the peoplebooks, but i was not able to keep up with that. I know like do-while is like WHILE loop in any programming language. here my question starts. WHILE has a condition inside the parenthesis and it will check whether that...

"difference between do-while, do-when, do-until and do ...

To do this in application designer, select Tools -> Validate Project. In application designer select Insert -> Definitions into Project or press CTRL + F7. Select the Application Engine Programs definition type, find your application engine program and select all the related definitions. Press insert.

Application Engine - PeopleSoft Wiki

PeopleSoft Application Engine is a PeopleTool used to carry out background SQL processing. Application Engines are neatly structured into blocks and offer an alternative to writing COBOL or SQR programs for background SQL processing.

PeopleSoft Application Engine - PSoftSearch

Application Engine Do Action Processing. Do-select: If it returns 1000 rows, then the subsequent actions will trigger 1000 times. Do-while: Its somewhat like a do-when but do-while is a looping condition. When the do-while returns at least a row (whatever the rowcount is), the subsequent actions will trigger once.

Application Engine Do Action Processing - Tech Community

Specifying Do Actions. When a Fetch statement results in an end of table message, the looping is complete. You cannot restart this type of Select statement because Application Engine does not perform a checkpoint or a commit within the step containing this action while Select/Fetch is running.

Creating Application Engine Programs - Oracle
