An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.

Search engine optimization (SEO) is the process of increasing the visibility of a website or a web page to users of a web search engine. [citation needed] The term refers to the improvement of unpaid results (known as "natural" or "organic" results), and excludes the purchase of paid placement. SEO may target different kinds of search, including image search, video search, academic search, news ...

The XI-2220 Hemi V-16: first Chrysler engine with a Hemi head design. Retired Chrysler engineer Pete Hagenbuch said while leading a tour of the museum:. If you look at a cutaway of this engine, and you're looking at a cutaway of the 1951 New Yorker engine, you'd think they were brothers, except these were upside down, maybe so they could mount a couple of cannons in the nose.
