So it got me thinking if anyone knows if it is possible to convert a 1995-2001 e38 740i to a 725i with a manual transmission using a donor 325i because I want a straight six with a manual transmission and the look of a 7-series. I would put work into the 2.5L engine before doing the swap so I am not concerned about power.

Especially as BMW never offered a manual V8 E38. I am nevertheless beginning to understand why some people prefer a manual E39 to an automatic - the auto is a bit indecisive it seems - and apparently it isn't a fault - just a characteristic!! In Sport mode it's fine.

Has anyone ever tried to convert a 750iL to a manual trans? At 176k I'm stating to wonder about the trans, shifts are a little harsh. I'm afraid to change the fluid at this point for fear of it not moving at all. A V12/5sdp set up would be cool. Anyone with experience?
