PowerBricks. Acura Embedded offers quality and technologically advanced computer solutions for rugged use. Our clients implement these products in divergent sectors like logistics, hydro-electric plants, oil and gas surface systems, fire/rescue/police departments and other industrial automation businesses.

Acura Embedded - Rugged PC | Rugged Computer

An embedded system is a controller programmed and controlled by a real-time operating system (RTOS) with a dedicated function within a larger mechanical or electrical system, often with real-time computing constraints. It is embedded as part of a complete device often including hardware and mechanical parts. Embedded systems control many devices in common use today.
