An engineering drawing, a type of technical drawing, is used to fully and clearly define requirements for engineered items.. Engineering drawing (the activity) produces engineering drawings (the documents). More than merely the drawing of pictures, it is also a language—a graphical language that communicates ideas and information from one mind to another.

- Hi, my name's Kevin Henry. I'm a product designer, educator, and author of the book Drawing for Product Designers. In this course, we're going to explore design sketching, or what's often called rapid ideation sketching. I'll combine technical explanations with illustrations, animations, and hands-on demonstrations of the processes and techniques we're going to be exploring.

Birch Bark Canoe Project: In the late summer of 2010, three friends and I realized a plan that was 3 years in the making: to paddle part of the old fur trade route in Northern Saskatchewan, and to do so in traditional birch bark canoes. Of course, you need a canoe to do so. To learn more about the trip and the construction of the canoe, click on the picture above.

AUTOMATION DESIGN: This robotic work-cell designed by Frisella Design employs a linear track mounted Epson robot to place short-run electronic components onto a through-hole printed circuit board. Two machine vision cameras, one equipped with on-axis LED lighting, are used to locate the leads on the component and precisely place the leads into through holes on the printed circuit board.
