- [Instructor] Another control statement we can put to use is the switch statement. Switch statements are great for cleaning up nested if statements if they start to get out of control or for implementing patterns like state machines. So let's see how we set this up in MATLAB. Our myFirstScript is getting a little out of control here.

The discussion about the data science roles is not new (remember the Data Science Industry infographic that DataCamp brought out in 2015): companies' increased focus on acquiring data science talent seemed to go hand in hand with the creation of a whole new set of data science roles and titles. And two years after the first post on this, this is still going on!
