Because an automotive machinist is focused on engines, you want to make sure you're receiving an education that focuses on engines too. Otherwise, if you enroll in a program for certification as an auto mechanic, you'll only gain passing knowledge of an engine and not the in-depth experience you'll need to become an auto machinist.

The Differences Between an Automotive Machinist and a Mechanic

The largest engine I will do is an outboard V-6. I don't normally do automobile engines because of the time it takes to set up, I can't charge enough for my time to be competitive with automotive machine shops that have a specialized boring machine. The largest engine I have bored was 5 1/4" and the longest was 6".
