The remote engine starter system consists of a transmitter that allows you to start and stop the engine from outside the vehicle.

Remote Engine Start System User's Information Manual

It requires a flow of air into the engine, which can only be achieved by creating suction (the engine does this when it turns over). If your engine isn't turning, there's no air. No air means that fuel can't combust. The starter motor is responsible for turning the engine over during ignition and allowing everything else to happen.
