### **Dodge Hemi Engine Cylinder Shut**

Does cylinder shut occur above a certain speed or every time I see EOC on the dash. Hemi 5.7 neither. ECO is more of an indication of your throttle use. MDS usually comes on if you're driving at a steady speed. i'm not sure on all the requirements but i know it's only supposed to come on within a ...

The Hemi is a 30,000 mile tune-up engine and has 16 plugs to change with some very expensive wires. The cylinders do not get the same wear since they are not producing any combustion pressure when shut down. Let hope it goes okay for all the first year guinea pigs.

### **HEMI 5.7L MDS technology, which 4 cylinders shut down ...**

Yes it came out in some HEMI's in 2004 but a better version was put in the HEMI in 2006. It will actually work under 40 mph and works when the throttle is closed and won't work well above 65 mph. You need to use only 5W20 oil for the system to work. I have a 2007 Dodge Ram and my best mpg so far according to the truck's computer has been 23 mpg on the turnpike at 65 mph with the cruise control set.

General hemi engine notes. Hemi production began in June 2002 at the Saltillo plant in Mexico; the first supercharged Hemi engine officially produced by Chrysler was shown to the public in January 2003, pumping out 430 horsepower and 480 lb-ft of torque, using the 5.7 Hemi engine and a Whipple supercharger (in the Dodge Magnum SRT-8 concept).

### **The modern 5.7 Mopar Hemi V8 engine - Allpar**

A hemispherical cylinder head ("hemi-head") gives an efficient combustion chamber with an excellent surface-to-volume ratio, with minimal heat loss to the head, and allows for two large valves. However, a hemi-head allows no more than two valves per cylinder, and these large valves are necessarily heavier than in a multi-valve engine. The intake and exhaust valves lie on opposite sides of the ...
