Differential Quadrature and Its Application in Engineering ...

Local radial basis function-based differential quadrature method is presented in detail in this paper.
The method is a natural mesh-free approach. Like the conventional differential quadrature (DQ)
method, it discretizes any derivative at a knot by a weighted linear sum of functional values at its
neighbouring knots, which may be distributed ...

Differential Quadrature (DQ) is a numerical technique of high accuracy, but it is sensitive to grid

distribution and requires that the number of grid points cannot be too large. These two requirements greatly restrict wider applications of DQ method.
