Engineering Economics 4-1 Cash Flow Cash flow is the sum of money recorded as receipts or disbursements in a project's financial records. A cash flow diagram presents the flow of cash as arrows on a time line scaled to the magnitude of the cash flow, where expenses are down arrows and receipts are up arrows. Year-end convention ~ expenses

## **Engineering Economics 4-1 - Valparaiso University**

Engineering Economics . The essential idea behind engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

## **Engineering Economics - Louisiana Tech University**

Engineering Economic Analysis is perhaps the most needed and used engineering topic presented in undergraduate engineering. The class is designed to provide the student with an understanding of cost accounting, time value of money, decision making alternatives, taxation, and capital budgeting.
