Density Practice: Worksheet #1

Archimedes' Principle, Pascal's Law and Bernoulli's Principle Lesson—Practice Problems Worksheet Answer Key 1 Practice Problems Worksheet Answer Key Show complete solutions to the following problems and box final answers with units. 1. A sample of an unknown material weighs 300 N in air and 200 N when submerged in an alcohol

Practice Problems Worksheet Answer Key - TeachEngineering

Again, the specific gravity is the density of the substance divided by the density of water, so This shows that the specific gravity does not change when measurements are made in different units, so long as the density of the object and the density of water are in the same units.

Density Solved Practice Problems - Calculating Density

Tests & Worksheets; Online Lessons; ... Density Answer Key. 1. Density is matter/solids. volume/mass. gas/liquid. mass/volume. 2. All of the following are acceptable units for density, EXCEPT g/mL. kg/L. g/cc. g/cm. 3. Given the mass and density of an object, which equation should be used to calculate the volume of the object? ...

Density Answer Key - HelpTeaching.com

Name Per: Date: Density Worksheet Chemistry in Context 2008-9 Perhaps someone has tried to trick you with this question: "Which is heavier, a pound of lead or a pound of feathers?" Many people would instinctively answer "lead." When they give this incorrect answer, these people are really thinking of density.

Name Per: Date: Density Worksheet

Solve problems concerning real-world situations using your knowledge of volume, surface area, and density. If you're seeing this message, it means we're having trouble loading external resources on our website. If you're behind a web filter, please make sure that the domains *.kastatic.org and *.kasandbox.org are unblocked.

Density word problems (practice) | Density | Khan Academy

So, if you have four significant digits for mass but only three significant digits for volume, your density should be reported using three significant figures. Finally, check to make sure your answer is reasonable. One way to do this is to mentally compare your answer against the density of water (1 gram per cubic centimeter).

Density Test Questions with Answers - ThoughtCo

Density Practice Problems The density of a substance is a measure of how much mass is packed into a certain volume of the substance. Substances with a high density, like steel, have molecules that are packed together tightly. Substances with a low density, like cork, have fewer molecules packed into the same amount of space.
