Electrical element. All electrical networks can be analyzed as multiple electrical elements interconnected by wires. Where the elements roughly correspond to real components the representation can be in the form of a schematic diagram or circuit diagram. This is called a lumped element circuit model.

Electrical element - Wikipedia

The force of attraction or repulsion between unlike or like magnetic poles, was first measured experimentally by Coulomb in 1820. With the help of torsion balance Coulomb found that "The force of attraction or repulsion between isolated point magnetic poles was proportional to the pole strength (m) and inversely proportional to the square of the distance between the poles".
