I am not a volvo mechanic but it sounds like a fuel pressure problem. If the lift pump or fuel pump sticks while running then the engine might consume the fuel left over in the secondary filter then die out. By priming the system with the lever on the pump you might be unsticking the pump for the time being.

Volvo:D12 Series - fuel gauge - boatdiesel.com

I run a 2010 VNL780 D 13 and keep loosing prime anytime the engine was shut down, replaced fuel filter housing because the prime pump was shot. and that still did not solve the issue. Pulled the injectors and all of them only had the top O ring in place. I replaced the injector cups and installed new O rings top & bottom on the injectors.
