Alternative Energy Engineering II Spring 2010 Number: 17724 Instructor: Larry Caretto Notes on Engineering Economic Analysis Introduction The economic analysis of alternative energy sources typically involves the comparison of an initial cost with a future savings. For example the decision to pay more money for a vehicle with a

Notes on Engineering Economic Analysis

Engineering Economics . The essential idea behind engineering economics is that money generates

money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.
