I have a 2008 450 isx cummins with 612000 miles. I keep getting engine fault code for crankcase pressure. when i change the filter it doesnt have much oil on it but the code will go away for about two days then it comes back when i have a load. after about a month i will get the red engine light to ... - Cummins ISX crankcase filter

### **What causes constant crankcase pressure code? - Cummins ...**

I know it is difficult to near impossible to diagnose an engine from a bit of written text, so I will ask in general, what are some of the most common causes of the stop engine light to light up and the engine to die when the light does so, on an N14 Cummins Celect in a 93 Pete 379? Here are some details on my situation, in case someone recognizes the issue or wants to take an educated guess.

### **STOP ENGINE light. N14 Celect. Most common causes ...**

When I called Good Sam, they put me in touch with a Cummins person that could come and check the codes. He told me there are only two reasons for a stop engine light. Cooling level, or oil pressure. There were two oil pressure sensors on mine, one for the stop engine light, and one for the gauge. The light sensor had failed.

Hello, I need ask all of the RV Gurus of the forum a question that hopefully someone can help with. First a little background. Ive had a Check engine light on my coach for a few months; its been

running like a top since we had the alternator replaced back in September. About then is when the ligh...

### **Check Engine Light On Cummins ISC 8.3 (300HP) - Engines ...**

If the stop engine light stays on for a length of time the ECM will go into protect mode and de-rate engine power, to allow the driver a warning time to get the coach off the road before engine shut down. That being said , if you have never got to the de-rate stage , the stop engine warning could very well be false.
