e36 engine | eBay

If you browse through the vast inventory on eBay, you can find multiple versions of these engines, including specific engine parts, such as an E36 M3 engine cover. If you need an E36 M3 engine mount, a BMW replacement stock motor mount typically works for all M3 models, as well as the later E46, E90, E92, and Z3 models.

E36 M3 Engine | eBay

We originally developed these mounts for E36 and E46 World Challenge racing but they also work perfect in BMW Modified and SCCA club racing and SpecE46 (SE46). These are machined from solid aluminum and have zero deflection. The engine torque will cause a rubber or urethane mount to flex or deflect.

The BMW M50 is a straight-6 DOHC petrol engine which was produced from 1990 to 1996. It was released in the E34 520i and 525i, to replace the M20 engine.. In September 1992, the M50 was upgraded to the M50TU ("technical update"), which was BMW's first engine to use variable valve timing. Called single VANOS by BMW, the system adjusted the phasing of the intake camshaft.

So, I've been flirting with the idea of figuring out how to get a VR6 in the E36. I would probably go with a 12v, and, as most of you know, the E36 engines are longitudinally mounted and the 12v VR6s are transversally mounted, so this would be the major challenge I believe. Also, would it be a sin to put a Volkswagen engine in a BMW?
