The Feldstein-Horioka puzzle of international finance refers to the concept that savings and investment are highly correlated at the country level. In the absence of transaction costs and other frictions, savings and investment shouldn't correlate at the country level for a small country. This prediction implies that, assuming no restrictions between countries, capital should flow [...]

The Feldstein-Horioka International Finance Puzzle - dummies

In general these puzzles are solvable. 2. An not solvable puzzle can be made solvable, if you swap two neighbor fields at the beginning. So one possibility is to try to solve the puzzle and in parallel try to solve the puzzle with one neighbor pair fields swapped. If a solution on the modified version is found, the original puzzle was not solvable.
