This Dr. Diesel™ Tech Tip, #168, is one in a series that we publish for people who run industrial engines. In contrast to most of our other Dr. Diesel™ Tech Tips, this one is aimed more at people who are responsible for the maintenance of industrial engines, in this case Deutz 1011 and 2011, and less at people who do the actual turning of wrenches.

I ended up buying the 883. Its the hardest starting Deutz I've ever seen. On a 45F day, it took a minute of cranking to get it to light off. Not sure if glow plugs are working but it shouldn't matter...My other 2 machines crank over twice and fire, without glowing on a day like today. 2900 hours, dealer serviced.
