The straight-five engine or inline-five engine is an internal combustion engine with five cylinders aligned in one row or plane, sharing a single engine block and crankcase. The justification for a five cylinder engine is that it is almost as compact as an inline-four, and almost as smooth as a straight-six engine.

The AAN is the perfect engine for this project as the original 924s featured the 2.0 liter cast iron Audi engine and we can still retain the cross-bred relationship. Additionally the AAN can be cleverly bolted directly to the 931's bell housing without the need for any conversion plates.

Valve Cover Gasket Replacement on AAN S4/S6 Five Cylinder Turbo engine. The valve cover gasket comes in 2 pieces, it has the center section which seals the spark plug holes, and the outer section around the edge. Replacing the valve cover gasket is fairly straight forward on these AAN 5 cyl turbo engines.

Indeed I have! The maxx tuning.de car is probably the prime example of a high output version of this swap. Oddly enough, he started with a 7A engine which has a 2.3L displacement (82.5mm bore) one of the advantages with the 2.2l AAN is it has more meat for future over boring as a repair method.

The AAN was made for a larger car, and you will run into fit problems with the oil pan and intake manifold, as well as some other smaller things. If you search the "projects" section of this site, you can see where a bunch of people have put AAN engines in place of 7A engines - reading those threads will give you a good idea of the differences.
