ME3901 - Engineering Experimentation This course was designed to develop experimental (and to a lesser extent, analytical and numerical) skills in modern engineering measurement methods, based on electronic instrumentation and computer-based data acquisition systems.

ME3901 - Engineering Experimentation

For undergraduate-level courses in Introduction to Engineering Experimentation found in departments of Mechanical, Aeronautical, Civil, and Electrical Engineering. The text offers a practical approach with current examples and thorough discussions of key topics, including those often ignored or merely touched upon by other texts, such as modern computerized data acquisition systems, electrical output measuring devices, and in-depth coverage of experimental uncertainty analysis.

Introduction to Engineering Experimentation, 3rd Edition - US

All scientific and engineering knowledge about the physical world and its governing principles has been gained by observation and experimentation. In science and technology, the process of understanding and progress has involved comparing theory with observation and measurement of physical phenomena and/or engineering artifacts.
