of reality (THINK) n Time value of money, cash flow diagrams, and equivalence n Comparison of
alternatives ... n Be flexible in using equations and tables n Check with alternate methods. 4

Engineering Economy Review

Professional Publications, Inc. FERC. Engineering Economics 4-1. Cash Flow. Cash flow is the sum of
money recorded as receipts or disbursements in a project's financial records. A cash flow diagram
presents the flow of cash as arrows on a time line scaled to the magnitude of the cash flow, where
expenses are down arrows and receipts are up arrows.

Engineering Economy presents a crisp, bold new design using color, highlighting and icons to focus on important concepts, terms, equations and decision guidelines. There are new features, new topics (such as ethics and staged decision making), and new online tools; yet no compromise on coverage, examples, or the well-accepted writing style of ...

Amazon.com: eBook Online Access for Engineering Economy ...

Engineering Economics . The essential idea behind engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

Engineering Economics - Louisiana Tech University

Example A sum of \$5,000 is deposited in a project account and left there to earn interest for 15 years. If the interest rate per year is 12%, the compound amount after 15 years can be calculated as shown below: PRESENT WORTH FACTOR The present worth factor computes P when F is given.

FE/EI/EIT REVIEW ENGINEERING ECONOMICS

INTEREST TABLES FOR ENGINEERING ECONOMICS. A fairly large problem involving different types of transactions in its cash-flows may take more time to solve it, if the students compute the values of the related interest formulas and then make substitutions in the respective expressions of the investment analysis.
