US EPA Wastewater Treatment Manual - Online. In the modern era, the typical onsite system has consisted primarily of a septic tank and a soil absorption field, also known as a subsurface wastewater infiltration system, or SWIS (figure 1-1). In this manual, such systems are referred to as conventional systems.

### **Septic design manual: Online version of US EPA Wastewater ...**

The distribution system discharges the wastewater into the voids of the porous media. The voids maintain exposure of the soil's infiltrative surface and provide storage for the wastewater until it can seep away into the surrounding soil. These systems are usually used to treat and dispose of septic tank effluent.
