FUNDAMENTALS OF DECISION MAKING FOR ENGINEERS George A. Hazelrigg Why should engineers be concerned with decision making? Engineers are decision makers, and decision making is what distinguishes engineers from scientists. The decisions that engineers make are often of very high consequence, to the engineer himself or herself, to the engineer's employer, and to society at large.

Machining: An Introduction: In terms of annual dollars spent, machining is the most important of the manufacturing processes. Machining can be defined as the process of removing material from a workpiece in the form of chips. The term metal cutting is used when the material is metallic. Most machining has very low set-up cost compared to forming, molding, and casting processes.
