A jet engine is a type of reaction engine discharging a fast-moving jet that generates thrust by jet propulsion. This broad definition includes airbreathing jet engines (turbojets, turbofans, ramjets, and pulse jets). [clarification needed] In general, jet engines are combustion engines. Common parlance applies the term jet engine only to various airbreathing jet engines.

Jet engine - Wikipedia

CSS3 Transitions are a presentational effect which allow property changes in CSS values, such as those that may be defined to occur on :hover or :focus, to occur smoothly over a specified duration - rather than happening instantaneously as is the normal behaviour.. Transition effects can be applied to a wide variety of CSS properties, including background-color, width, height, opacity, and

A diesel locomotive is a type of railway locomotive in which the prime mover is a diesel engine. Several types of diesel locomotive have been developed, differing mainly in the means by which mechanical power is conveyed to the driving wheels.. Early internal combustion locomotives and railcars used kerosene and gasoline as their fuel. Dr. Rudolf Diesel patented his first compression ignition ...
