Energy Skate Park Clicker Questions (Inquiry Based) Description These are the clicker questions from all four of my "Conservation of Energy using Energy Skate Park" activities. For more information on how I used them, download the lesson plans for each: Subject Physics: Level High School, Undergrad - Intro: Type

The skate park is an excellent example of the conservation of energy. The law of conservation of energy tells us that we can never create or destroy energy, but we can change its form. In this lab, we will look at the conversion of energy between gravitational-potential energy, work, and kinetic (or moving) energy.

Students experiment with an online virtual laboratory set at a skate park. They make predictions of graphs before they use the simulation to create graphs of energy vs. time under different conditions.
