Engine Backfire No Start - Engine cranks fire, loud backfire, , Thanks for the ideas. well, i will check that, but the cas has not been off this car ever. if the cas failed, could it cause this? as i sit here & think things through, it's as if while the starter is engaged (or maybe when the ignition switch is in the start position) it has no spark..

## **Engine Backfire No Start | 2018, 2019, 2020 Ford Cars**

Engine Cranks But Won't Start What's causing the no-start? All engines require three things to start and run: spark, fuel, and compression. If any one of these isn't there, you aren't going anywhere.

### **Problem 5: Engine Cranks But won't Start - OBDII Scanner**

Care has to be taken to slowly tighten the nut, then nip to required torque. If you tighten it too fast, say with a ratchet or an air gun the torque can put pressure on the key before it is tight and "half" shear the key. This results in the timing be slightly advanced and backfiring the engine or too far advanced not allowing the engine to start.

### **8hp briggs backfires but won't start???? - MyTractorForum ...**

Problems with one of the several sensors that the computer uses to monitor the engine, such as the oxygen sensor or airflow sensor, can cause the computer to misread the fuel and air mixture requirements of the engine. When this happens, the computer may not add enough fuel to the incoming air, resulting in pre-ignition and backfiring.
