Originally posted by Kirwin I have to disagree with you on this point as this is the same location that the factory uses on the engine to sense oil pressure. I reference page 9-340 in the 03 service manual and from the Cummins manual for option SD9009 for the 97 show that this location is after the oil filter but it is the oil pressure the is present at the main oil rail.

### **Oil pressure at idle | Turbo Diesel Register**

Should I take it to Cummins? You might want to have the oil pressure tested for peace of mind. There is an oil gauge anomaly on the Ram ISB where the pressure drops slightly at idle, but the Ram PCM fails to properly communicate with the Cummins Engine Computer, so the Dodge PCM indicates no pressure even though there is no problem.
