This sometimes leads to the assumption that an engine is incorrectly timed as obviously the chance of the engine stopping so that the marks are in register or even nearly so is ...

**Overhauling The Engine - dunhackin.com**

The groove on the left is considerably deeper than the right. You can also see a wide band of wear just to the left of the left side groove. I suspect that is caused by leftover casting sand in the coolant passages that migrated to the seal area. This engine exhibited NO signs of coolant leaking into the oil at the time of this pump overhaul at 1.
