I have a small piece of plant that has a 2 cylinder oil cooled deutz engine in it. The problem is when it starts up it smokes quite bad but it does clear a bit when it heats up then on idle for a bit and back on to operating speed there is a plume of black smoke. Just asking if anyone has had this before and if it's worth trying to repair or best to get rid ?

I ended up buying the 883. Its the hardest starting Deutz I've ever seen. On a 45F day, it took a minute of cranking to get it to light off. Not sure if glow plugs are working but it shouldn't matter...My other 2 machines crank over twice and fire, without glowing on a day like today. 2900 hours, dealer serviced.
