The excretory system filters your blood to remove wastes that could be harmful to your body. The kidneys are the blood filters that make urine. Urine passes through the ureters to reach the bladder, which is the temporary storage organ for urine. Urine leaves the body through the urethra. To unlock this lesson you must be a Study.com Member.

### **Excretory System Lesson for Kids - Study.com**

Many are flushed out of the body by the urinary system. Two kidneys process your body's blood and remove excess water and waste. This waste liquid, called urine (pee), is carried from the bladder via the urethra when you go to the bathroom. The kidneys produce urine. It is then pushed by waves of muscles squeezing along two ureters to the bladder.
