Those engines came with quite a few hp ratings to suit the different applications that they were installed. I'm guessing that the DM950 was first used because of availability, then was later changed to the DM850 because they only needed the smaller engine to make 23hp. Ratings are often just that. I replaced a similar turbo engine in scag z-turn.

3. I'm pretty sure that machine will have a kill wire attached to it somewhere on the side of the engine like mine does. Mine is a yellow wire attached to the right side of the engine about half way down. You may have to call to verify that, but I'm almost certain you will have one. Take the wire loose and see if the engine runs. 4.
