A Project Deliverable is a product or service that a project produces for its customer, client, or project sponsor. It is the product or service that the project “delivers” to its stakeholders.. It can be tangible or intangible, for example, a contractor who is hired to provide a training course provides the course itself back to their client as the project's deliverable.

What is a Project Deliverable?

Creationists often argue that evolutionary processes cannot create new information, or that evolution has no practical benefits. This article disproves those claims by describing the explosive growth and widespread applications of genetic algorithms, a computing technique based on principles of biological evolution.

Genetic Algorithms and Evolutionary Computation

Creating a team charter is a great first activity for your newly-forming team. Why? It helps build team cohesion and trust, gets you off to a quick start, and is a great activity to get everyone — team members and management — onto the same page.
