Dynetics, an employee-owned company, is seeking a talented Digital Signal Processing (DSP) Engineer to join a diverse team to create unique solutions for complex problems. With offices across the United States engaging in the defense, space, cyber and commercial fields, Dynetics provides responsive, cost-effective engineering, scientific and IT solutions. Dynetics' National Intelligence group ...

Dynetics Careers - Digital Signal Processing Engineer

I have long worked on signal processing for multichannel VLF radio receivers, first analog signal processing then digital signal processing since the early 1990s. I never used a hard DSP chip, because the DSP chips of the day always lacked the math capabilities I needed at the time.

The Scientist and Engineer's Guide to Digital Signal ...

Digital signal processing (DSP) is the use of digital processing, such as by computers or more specialized digital signal processors, to perform a wide variety of signal processing operations. The signals processed in this manner are a sequence of numbers that represent samples of a continuous variable in a domain such as time, space, or frequency.
