These high pressures improve the atomisation of the fuel thus improving ignition and combustion within the engine. In addition to the increased pressures, the electronic control significantly improves the flexibility of the system over older mechanical fuel injection systems – for example, during a single combustion stroke the injector may inject up to seven times per cylinder per stroke.

A dual-clutch transmission (DCT) (sometimes referred to as a twin-clutch transmission or double-clutch transmission) is an automated automotive transmission, closely related to a manual transmission. It uses two separate clutches for odd and even gear sets. It can fundamentally be described as two separate manual transmissions with their respective clutches contained within one housing, and ...
