A science, technology, engineering or math degree can show law schools an applicant is used to rigor, even with a relatively low GPA. An understanding of biology and chemistry is valuable in the practice of environmental law, and intellectual property law is a common practice area for those well versed in technology. For example, I recently worked with a client who was an engineering major, and together we selected schools that have strong intellectual property programs.

Tweet to @learnleo. Engineering (or any hard science) and law can be a powerful combination. The communications skills developed in law school can be a great complement to the quantitative skills developed in your engineering training. The framework for analyzing legal cases is also largely similar to scientific problem solving techniques.
