Tip: You can directly connect a printer with an Ethernet interface to a computer using a crossover cable (not the same as a patch cable). This special cable allows you to bypass using a router or switch to connect a computer to a printer for testing. To use this setup set the IP address of the computer and the printer statically, both in the same sub domain, with different addresses.

One of the most important decisions you face when scanning anything with your scanner is choosing what dpi ("dots per inch") to scan with. And specifically for this post, what is the best dpi to use when scanning and archiving your 8x10" and smaller paper photographic prints - which for most people, make up the majority of our pre-digital collection.

The DPI You Should Be Scanning Your Paper Photographs

Newer information. I've written a review of the Eye One Design from GretagMacbeth where I use the same K80 to check out the 'Easy RGB' profiling function. There is also a review of Scanner profiling which would make the process described in this article much more accurate. There is also a review of the MonoChromePro ink set from PermaJet where I discuss setting up the shareware ...
