Elements Of Agricultural Engineering By J Sahay

Agricultural Engineering is the area of engineering concerned with the design, construction and improvement of farming equipment and machinery. Agricultural engineers integrate technology with farming. For example, they design new and improved farming equipment that may work more efficiently, or perform new tasks.

How to Become an Agricultural Engineer ...

Agricultural engineers typically do the following: Use computer software to design equipment, systems, or structures. Modify environmental factors that affect animal or crop production, such as airflow in a barn or runoff patterns on a field. Test equipment to ensure its safety and reliability.
