Not really. The T444E marine application will have the higher hp (300) and higher operating RPM (3800). There are other physical differences between the engines depending on their application. For example the marine engine will have a different manifold, different compression ratio, different injectors, a higher flow Rexroth pump, and a ...

**Difference between PowerStroke 7.3L and International ...**

The premium wet-sleeve engine design has been improved over the years and the engine can be rebuilt "in-frame" rather than necessitating it's removal as in parent bore engines such as the T444E or the CAT 3216, etc. The former engine seal problems have gone away on all of the IC engines (don't know about the new powerstroke).
