Global climates are often divided into five types: tropical, dry, temperate, cold and polar. These climate divisions take a variety of factors into consideration, including altitude, pressure, wind patterns, latitude and geographical characteristics, such as mountains and oceans. The five climate division is known as ...

The group velocity of a wave is the velocity with which the overall shape of the wave's amplitudes—known as the modulation or envelope of the wave—propagates through space.. For example, if a stone is thrown into the middle of a very still pond, a circular pattern of waves with a quiescent center appears in the water, also known as a capillary wave. ...
