Print jobs will be kept in the printer queue if you shut down the system while a job is being processed. This means a broken print job will still be there even after rebooting and you need to remove it from the queue manually with the commands mentioned above.

5.7. Command-Line Tools for the CUPS Printing System

This book is for anyone who is responsible for administering one or more systems that run the Oracle Solaris operating system (OS). The book covers a broad range of Solaris system administration topics such as managing user accounts, diskless clients, booting a system, using the Service Management Facility (SMF), and managing software and patches.Topics are described for both SPARC and x86 ...

Setting Up and Administering Printers by Using the CUPS ...

CUPS. CUPS is the standards-based, open source printing system developed by Apple Inc. for macOS ® and other UNIX ®-like operating systems.CUPS uses the Internet Printing Protocol (IPP) to support printing to local and network printers.

CUPS.org

The Common UNIX Printing System server's behavior is configured through the directives contained in the file `/etc/cups/cupsd.conf`. The CUPS configuration file follows the same syntax as the primary configuration file for the Apache HTTP server, so users familiar with editing Apache's configuration file should feel at ease when editing the CUPS configuration file.

CUPS - Print Server - Official Ubuntu Documentation

CUPS (formerly an acronym for Common UNIX Printing System) is a modular printing system for Unix-like computer operating systems which allows a computer to act as a print server. A computer running CUPS is a host that can accept print jobs from client computers, process them, and send them to the appropriate printer.

Software anual for inux - 4 - TSP Printer Introduction This manual explains how to operate the CUPS printer driver using ubunts 18.04LTS as an example. Images provided are different for other versions of ubunts or other distributions, but the same procedures can be used.

Star CUPS Driver Software Manual for Linux

Sharing via Samba. Samba is an implementation of the Windows file and printer sharing protocols, even the most vintage ones.. Note that printer sharing using Samba is usually more difficult to configure and maintain.. To configure Samba on the Linux server, edit `/etc/samba/smb.conf` file to allow access to printers. File `smb.conf` can look something like this:
