Step 6: Place back the oil dipstick inside the shaft. Refill the oil and you should be good to go. Remember to never use a stick with a glue to retrieve a broken dipstick from the engine since the glue can fall off and contaminate the oil supply. A small amount of glue getting mixed up with the engine oil can lead to all sorts of car trouble.

It's a different thing, however, when it comes to engine oil. You have to use a long, thin rod known as the oil dipstick. You have to dip this rod into the engine to check the oil level through the markings on the stick. Oil on the dipstick will tell you if there's still enough fluid to lube up the numerous engine parts or if it's time to fill up.
