The critical path method (CPM) is a popular scheduling technique in the construction industry due to its simplicity and effectiveness. It generates a graphical view of a project and calculates how much time and resources are required to complete each activity. It also determines critical activities requiring attention so that the project can be completed on time.

Learn About Critical Path Method Scheduling

SmartPM™ analyzes P6 and MS Project schedule files, and in a matter of minutes, assesses schedule quality, integrity, critical path delay causes, compression, and feasibility – in addition to forecasting realistic completion dates.
