The InterCity 125 (also referred to as the High Speed Train) is a diesel-powered passenger train built by British Rail Engineering Limited between 1975 and 1982. Each is made up of two Class 43 power cars, one at each end of six to nine Mark 3 carriages. The name is derived from its top operational speed of 125 mph (201 km/h). Initially the sets were classified as Classes 253 and 254.

InterCity 125 - Wikipedia

The British Rail Class 373 or TGV TMST train is a French designed and built electric multiple unit that operates Eurostar high speed rail services from London to France and Belgium through the Channel Tunnel. Part of the TGV family, it has a smaller cross-section to fit the smaller loading gauge in Britain, was originally able to operate on the UK third rail network and it has extensive ...

Hi, Glow plugs should be removed with the engine hot - this can help release tight glow plugs due to expansion on the cylinder head when hot. A cold engine will be quite hard to remove if the plugs are siezed. Even then there is a chance that if siezed the plug will break off - if this is the case then really the only option is for an engineering shop to remove the broken plug.
