This course introduces the concepts of System on Chip Design Verification with emphasis on Functional Verification flows and methodologies. The course also teaches how to code in SystemVerilog language - which is the most popular Hardware Description Language used for SOC design and verification in semiconductor industry.

SOC Verification using SystemVerilog | Udemy

At NeuroDevelopment Center, we help kids find a brighter future. Kids think and communicate differently. We speak "kid"! We have found that when you speak their language, children like getting help and are active partners in change. We like to reach out to their entire network: family, friends, school, and even social environments.

Creationists often argue that evolutionary processes cannot create new information, or that evolution has no practical benefits. This article disproves those claims by describing the explosive growth and widespread applications of genetic algorithms, a computing technique based on principles of biological evolution.

Genetic Algorithms and Evolutionary Computation
