### **Digestive And Endocrine Systems Workbook**

The digestive and endocrine systems work together, mostly through the pancreas, to produce and disseminate digestive enzymes. The endocrine system contains several different organs and glands, which are the hypothalamus, pituitary, parathyroids, adrenal glands, reproductive glands, thyroid and pineal body.

### **How Do the Digestive and Endocrine Systems Work Together ...**

While the endocrine system is concerned with the production of hormones, the digestive system is involved with processing food. Although the two systems seem quite different, the gut is actually the largest of the body's endocrine organs, making the endocrine system and digestive system closely linked. Inside the intestines, ordinary gut cells are interspersed with individual endocrine cells ...
