GREENSBORO, NC — Volvo Trucks North America has discontinued North American production of the 16-liter Volvo D16 engine. A statement from the OEM says the decision is the result of limited market demand for this engine displacement and the long-term investment that would be required to maintain the D16 for the unique operating requirements of the North American market.

The 08+ and some the 07 D13 and D16 engines had problems with the injector cups due to the higher injection pressures. They were prone to failure and are expensive to fix and can cause over the road breakdowns for sure. Volvo has remedied this by installing stainless steel cups and conical injectors to deal with the higher pressures.
