Engine Pistons. Contributed By: Brian C. The pistons are one of the most important parts of an engine, because they are the mechanisms that contains the engines energy. The pistons are located in the cylinder block. The number of cylinders in an engine can vary. Inside the cylinder a mixture of fuel and air is injected through the intake valve. Pressure in the cylinder is created when the piston ...

A lane detection system used behind the lane departure warning system uses the principle of Hough transform and Canny edge detector to detect lane lines from realtime camera images fed from the front-end camera of the automobile. A basic flowchart of how a lane detection algorithm works to help lane departure warning is shown in the figures.
