ETABS's Auto Select Section List feature helps to the time reduce required to develop the model as well as to enhance the design process. An auto select selection list is simply a list of sections; for example, W18X35, W18X40, W21X44, W21X50 and W24X55. Auto select section lists can be assigned to frame members.

ETABS User's Manual. ETABS is a special purpose computer program developed specifically for building systems. The concept of special purpose programs for building type structures was introduced over 35 years ago [R. W. Clough, et al., 1963]. However, the need for special purpose programs, such as ETABS, has never been more evident as Structural...

Design of steel and concrete frames (with automated optimization), composite beams, composite columns, steel joists, and concrete and masonry shear walls is included, as is the capacity check for steel connections and base plates. Models may be realistically rendered, and all results can be shown directly on the structure.
