A driver's license is an official document, often plastic and the size of a credit card, permitting a specific individual to operate one or more types of motorized vehicles, such as a motorcycle, car, truck, or bus on a public road.. In most international agreements the wording driving permit is used, for instance in the Vienna Convention on Road Traffic.

REST is acronym for REpresentational State Transfer.It is architectural style for distributed hypermedia systems and was first presented by Roy Fielding in 2000 in his famous dissertation.. Like any other architectural style, REST also does have it's own 6 guiding constraints which must be satisfied if an interface needs to be referred as RESTful. ...

What is REST - Learn to create timeless RESTful APIs.

The CAN Protocol Tour gives an overview of the ISO 11898-1 and ISO 11898-2 standards. This tour provides a great introduction to the fundamentals of CAN as it is used in automotive design, industrial automation controls, and many, many more applications.

CAN Protocol Tour by Kvaser

Depending on your country and state, OBDII vehicle may not pass the annual inspection unless the required monitors since reset are complete.For example, the US Environmental Protection Agency guidelines allow up to two monitors to be not ready for model year 1996 through 2000 vehicles. For 2001 and newer model year vehicles only single monitor status can be incomplete or not ready.

OBD2 Readiness Monitors Explained | OBD Auto Doctor
